INTRODUCTION TO OUR SUMMER EDITION;

What an action packed summer for the Climate Hub team and all our delivery partners. With a new team structure and delivery model, we've got our four Climate Ready Communities well and truly up and running, creating impactful climate and reliance events and projects, more to share in the following pages.

The successful recipients of our SEED funding have all engaged in Scotland Governments National Climate Week, 28 Sept to 4 Oct. What a delight to see that all 18 of our various funded groups have actively delivered an event during this week. We had an astounding 24 events over the week, a great effort and testimony to the commitment from local communities as they take ownership of their own localised climate resilience and mitigation initiatives.

As part of our four Climate Ready Communities [CRC's] MOU's, we have delivered free Carbon Literacy training course in each of their communities, which is a certified qualification. This learning initiative has given the participants and leads for the CRC's some context and background on a wide range of carbon and climate related impacts.

Faith and Phoebe have hit the ground running with their new roles at the Climate Hub. Having dual roles shared between the Galloway and South Ayrshire Biosphere and the Climate Hub, has already proven to have some great synergies and economies of scale with our communities based work.

Senga Greenwood, Interim Climate Hub Manager, October 2026

Contact Senga by email:
senga@gsabiosphere.org.uk or call 07918126677

OUR COMMUNITY OFFICER PHOEBE

Phoebe is our Community Officer for the Galloway & Southern Ayrshire Biosphere and D&G Climate Hub. She has been with us for four months now, and some of you may already have met her. Here, she shares a few highlights from her first few months in the role:

"It's been an exciting first four months with the Climate Hub and the time has flown by! I've already been involved in lots of different projects and met so many great groups doing brilliant work across Dumfries and Galloway. One of my favourite parts has been getting out into communities and seeing the variety of climate action happening across the region, from repair cafés and community gardens to recycled art workshops. I've also really enjoyed getting to know our four Climate Ready Communities and being involved in selecting our ten Seed Fund projects.

I've also completed Carbon Literacy training and have since co-supported two courses and led one myself, with more planned over the coming months. We've been taking our Climate Ready Dumfries and Galloway Roadshow around the region too, with interactive displays and workshops in ten communities. It's been really interesting hearing directly from local people about their experiences of climate change and what they think their communities need to prepare for it.

A real highlight has been visiting some of our Climate Ready Communities and seeing their work first hand. I particularly enjoyed visiting All Roads Lead to Whithorn, staying in the community bunkhouse and enjoying a lovely meal cooked by Sylvia, before their pop-up event the following day. I also visited Creative Stranraer, where I got to try my hand at weaving and learn more about their work. Climate Week was another great opportunity to visit different events and see some of the creative ideas happening across the region. I've already learnt so much and met so many great groups in my first four months, and I'm really looking forward to getting out and meeting even more communities!"

GALLOWAY AND SOUTHERN AYRSHIRE BIOSPHERE

The Galloway & Southern Ayrshire Biosphere Partnership welcomed a new member of staff in September as Jack Barton joined the team as Nature Recovery Officer for the UNESCO region. Jack has a background working for environmental NGOs, and his previous jobs have ranged from seabirds on Shetland, to peatlands in southwest Scotland, to Species on the Edge on the Solway Coast.

Biodiversity loss and climate change are the global challenges of our time, and inextricably linked. Nature restoration that is collaborative and multi-scale helps secure healthy, robust ecosystems, which in their turn support climate resilience. Jack's project portfolio includes the Ayrshire Small Scale Tree Planting Scheme, which aims to increase native tree cover in an area where less than 1% of land now supports native or semi-native woodland. Jack will also be working on red squirrel conservation, delivering public engagement activity and outdoor learning sessions and helping new volunteer groups get up and running.

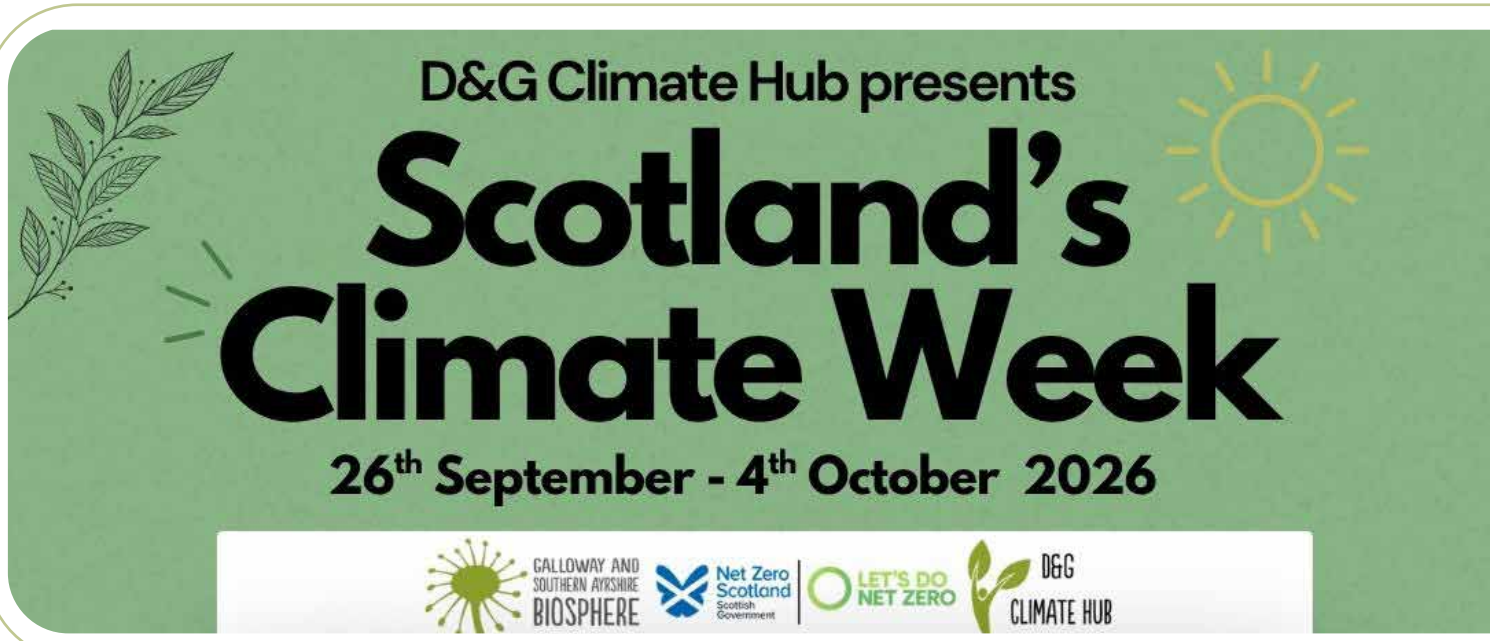
Jack's work, and that of his colleagues on the Biosphere team, is very much enriched by awareness of community-led nature recovery projects that are in development or already underway; if you are involved in local activity supporting wildlife and habitats, please do get in touch via the contact details below.

D&G Climate Hub partners are also warmly invited to contact the GSA Biosphere Partnership to request marketing materials that would be useful to share with clients, customers or local stakeholders. A range of leaflets is available that introduce the Galloway & Southern Ayrshire UNESCO Biosphere and includes itineraries for nature tours, heritage trails, and Low Carbon Days Out by bus, bike and train. All are suitable for businesses and attractions, community and visitor hubs, and there is no cost to have these sent out.

Local community groups, businesses, schools and social enterprises interested in networking and learning opportunities can sign up to the Biosphere's Proud Supporter scheme, which currently numbers over 400 members with a shared commitment to sustainability. New signatories receive a 'Welcome' Facebook post and mention in the Biosphere's monthly e-newsletter (both great for widening awareness of local climate action), and invitations to special events which help individuals and groups forge new relationships and collaborations. The Proud Supporter scheme is also entirely free and there is no requirement to be located within the UNESCO Biosphere; sign up is via a simple form at www.gsabiosphere.org.uk.

More information about anything mentioned above is available by email request to info@gsabiosphere.org.uk. The Biosphere team post regularly on Facebook, Instagram and LinkedIn; follow #gsabiosphere to keep up to date with news and events.

SCOTLAND'S CLIMATE WEEK – THE BIGGEST YET FOR D&G



This will be the third year the Climate Hub has participated in Scot Gov's Climate Week. From families making small daily changes, to businesses transforming how they work, to community groups creating local solutions, climate action is happening in every part of our country. Climate Week is a chance to celebrate these efforts locally, and we encourage everyone to get involved. Together, these actions add up to create meaningful change for Scotland's future.

Each year we've built momentum across D&G, and increased our engaged and funded community groups. This year we've got 25 events over 9 days! Official dates are 28 Sept to 4 Oct, but some of our partners started events on 26 Sept.

With 18 official groups and communities funded by the Climate Hub, everyone put in 1-2 events, all celebrating the great work they do in their locale ; everything from nature based activities, biodiversity and bioblitz's, up-cycling and recycling to all manner of arts and crafts.

Please enjoy the next pages, showcasing some of our amazing delivery partners events and activities over Climate Week.

BALLOCH WOOD CLIMATE WEEK EVENT

Balloch Wood on the periphery of Creetown is one of Climate Hubs new SEED fund partner. A successful day was had starting with a fun time in the Waverley Hall with a singer/storyteller, followed by an update on where they are as a group, Thanks were given to the Climate Hub and Scottish Govt for funding, a thanks to Forestry and Land Scotland for permissions, and a references to Climate Week, land restoration, peaty pockets and native trees and their relevance for carbon capture.

They had 25 participants including 5 children, planted 50 sessile oaks in an avenue along the core path; people said it was a fab day - let's do it again. The first tree was planted by a young Ukrainian boy (picture attached) - a refugee, who kissed the tree and waved a blessing on to it.

MOSSBURN COMMUNITY FARM

A great event to kick start Climate Week at Mossburn Community Farm

Saturday 26 September Senga and Phoebe were joined by Morgane Perez-Huet from the Scottish Government Climate Hubs Team. This was a brilliant morning of identifying and naming moths at Mossburn Community Farm

Malcolm from South West Scotland Environmental Information Centre brought along the moths he had trapped the night before, and we got to see some amazing species up close and learn all about moths, including the fascinating world of micro moths. We also found out more about how our changing climate is affecting moth species.

We then had time to explore the brilliant Mossburn Community Farm and meet some of the adorable animals that live there. Mossburn is an animal sanctuary that also provides animal assisted therapy and learning opportunities for young people.

A huge thank you to Malcolm and everyone at Mossburn for such an interesting and enjoyable morning!

ELVES CLIMATE WEEK EVENT IN LINCLUDEN

On 3 October Senga visited Lincluden where ELVES CIC volunteer group have cleaned up the paths and grounds at Popeye community park. The D&G Climate Hub SEED funded the ELVES to allow them to purchase a large selection of garden tools and equipment.

Todays new project was putting the new raised beds at the Lincluden Community Centre. This is a real collaborative project; wood donated from James Jones timber mill, wooden raised beds made by Dumfries Academy pupils [lead by teacher Stephen Mohan]and mulch donated from local gardens. The two large bucket containers were gifted from A Patch Ae Land community garden at neighbouring Sandside. Paul from Sandside garden came over to check on the progress.

Nathan from Dumfries Academy stood in the bucket to test for strength!

Kids went foraging for tree seeds and came back with an impressive array of samples to identify. Young Albie was very enthusiastic and knowledgeable!

Witnessed a great use of bottle lids on existing raised beds - making rainbows, image below.

Great work being done around Dumfries by the ELVES team, so if you have a community based project needing land clearing and planting get in touch with Jakob, the Project leader at ELVES.

WANLOCKHEAD'S 'HIGH JINKS' FOR CLIMATE WEEK

And the Climate Week events continue across D&G! Wanlockhead is a very small village [AND famed as the highest in Scotland] We visited the Wanlockhead Community Centre with a dual purpose; to see the Climate Hub funded soup kettles, Ninja air fryers and new community fridge, and to participate in the Community lunch. This is a very pro-active wee community that really delivers on activities, sharing produce/food and resilience. [Unsung hero volunteers are Carole and Lyndsey] 🥰

The repurposed old classroom is now a food larder that stores perishable produce from their adjacent community garden. and social space as well as a clothes swap. Thank you for the fridge sign acknowledging our SEED funding contribution. Poly tunnel is keeping the fridge well stocked. Well done Wanlockhead Community Centre SCIO, great to see local climate related activities being so well supported.

BEACH ART WORKSHOP WITH MAC-CAN AND NUMBER 12 PORTWILLIAM

Machars and Cree Valley Climate Action Network are hosted three fantastic marine based art and craft activities on Saturday 18 July. This is a great collaboration with Number 12 Portwilliam, who are one of our SEED funders, and using the funds to do arts and crafts related activities. The results of some of the sand art is on the stairwell wall at Number 12 such talent over in the Machars.

If you're ever over in Portwilliam do yourself a favour and pop in to see and experience what is an amazing Community Hub. Rebecca and her partner Bob, own the building and run the Hub, such a prime position right on the harbour [look at the views!] wall and a great gift for the area.

CARBON CRICHTON CENTRES FUN AND EDUCATIONAL CLIMATE WEEK EVENT

This time Phoebe joined the Crichton Carbon Centre for an ocean acidification event. This was hosted at the community space in the Loreburn Centre and used by Dumfries based Community organisations

Carys from the Carbon Centre led the session, where we tested the pH of some common everyday items and then looked at the effect of acid on shells.

It was a great way to explore how carbon dioxide from the atmosphere is absorbed by our oceans, making them more acidic, and what this can mean for shellfish and other marine life.

Thanks to Carys and the Crichton Carbon Centre for hosting and leading such an interesting session!

LAST CLIMATE WEEK EVENT AT AUCHENCAIRN

On Sunday 4 October Phoebe visited Auchencairn where Auchencairn Climate Transition SCIO were hosting two Climate Week events. As one of our Climate Ready Communities, they have been doing lots of work locally, and it was great to come along and see some of this in action.

Lee from Torr Organic Dairy Farm took us on a walk around the local area, sharing the history of the landscape and how it has changed over time. We heard about the use of local clay to make bricks, spotted invasive knotweed and visited fields that are covered by the sea at high tide. The walk also gave us a chance to hear more about local flooding risks and the impacts that sea level rise and climate change could have on the area. Along the way we explored the new boardwalk and heard about the Pudding Ghost!

After the walk, we headed to the tat swap, where people brought along clothes and other items they no longer wanted and swapped them for something new , giving things a second life rather than buying new. A really interesting day, and a great example of the different ways communities can get involved in climate action.

NUMBER 12 PORTWILLIAM ; AN EXEMPLAR COMMUNITY HUB

Senga travelled to Portwilliam on 24 September to spend time at the Number 12 Portwilliam . As a newly established SCIO, this Community Hub building was bought and founded by couple Rebecca and Bob, is an outstanding example of local philanthropy, and giving selflessly to their community.
So many accolades here . Firstly this large building sits directly on the Harbour wall is so scenic. It was once 2 cottages, now knocked into one large labyrinth of themed activity rooms. This morning was womens crafts, Upstairs was a very busy, instrument filled music room with thousands Theres also a computer room/hotdesk space available for all. On the hall wall is a fabulous B&W display of sea and shore art, a competition done in conjunction with MAC-CAN

The Mens shed were busy making a set of shelves. They meet every Thursday morning and its great to see a wide range of age groups.

Lastly, Rebecca wants to address the lovely harbour wall garden [see sea views], all a bit wild presently. Come early spring there will be plans to plant and make it a community garden and growing space. What an inspiration this bustling community hub is, an exemplar SCIO looking after its community.

GSA BIOSPHERES 'BIOSPHERE CONNECTIONS' EVENT IN MID NITHSDALE

On 30 July the Climate Hub staff helped with GSA Biospheres 'Biosphere Connections' Event at Old School Thornhill. As name suggests, this event was all about building connections between people and groups with shared goals, who may not usually have opportunity to meet. Some really interesting discussions emerging.

It was a first major networker for Proud Supporters - the individuals, communities, businesses, charities, and other organisations who have signed up to our Charter for Sustainability and are supporting both the work of the Galloway & Southern Ayrshire Biosphere Partnership and the GSA UNESCO Biosphere region.

Special thanks to our invited speakers, David from Moniaive Initiative, Laura from New Cumnock Development Trust and FitFest New Cumnock and Joshua from South of Scotland Enterprise Youth Forum and CatStrand Creatives Youth Players, who also writes for the Glenkens Gazette as a local resident and researcher into local history.

WHITHORN'S CLIMATE READY COMMUNITY OPEN CONSULTATION

On 23 September Senga from the Climate Hub helped facilitate an open Consultation and 'needs' analysis at Whithorn's Climate Ready Community [CRC]. The New Town Hall hosted the venue, with Sylvia our CRC lead, facilitating. There were 5 themes covered, all of which are critical facets of a healthy, functioning community/area. There was some great local intel, feedback, observations and ideas. Themes were ; Nature & Environment ; Health and Well-Being; Travel; Energy and Food. Some of the key ideas will be taken forward and explored further by Sylvia and some of the attending volunteers.

To add to the fun of the day, we showcased the wonderful up-cycled plastic sea creatures that the local children made - so creative! Lights will go inside all the creatures and form part of the parade for Halloween in Whithorn. Great things happening in Whithorn and more to come as the new CRC team respond to locals ideas and aspirations.

AUCHENCAIRN CRC NEWS SUMMER '26

ACT has been enjoying raising climate awareness with a series of accessible events and activities in the spirit of fun and celebration, bringing our community together with resilience and sustainability. Highlights this summer from our 'Climate Ready Communities' project include a pop-up pub quiz night, bike dressing activities with recycled materials, guided walks on land-use, and promoting reduced consumption through 'Tat-Swaps'.

We also host regular biodiversity group activities, community allotment sessions, a village Cycle Hub, and an outdoor playgroup. We aim to approach the current meta-crises from the

grass-roots up, through adaptability, mitigation, and community empowerment. And we intend to rejoice along the way!

Upcoming events include an expert-led 'Where We Are Now' discussion with a D+G climatologist, and a vibrant local makers' Christmas market. Please check out our website act.scot for more details.

MOFFAT CLIMATE READY COMMUNITY UPDATE

Over the summer, Climate Ready Moffat & District has been exploring how sharing can become part of the practical infrastructure of a more resilient community. Our Upper Annandale Timebank has grown to around 49 members, while six Seed Library sessions have helped people access and share seeds and growing knowledge. We have also begun developing Grow Moffat, matching people who have unused garden space with people who want to grow, and Hidden Harvests, which will help locally grown surplus food find its way to people who can use it.

These strands are now beginning to come together. Our first ShareFest Food Swap in October will bring surplus fruit and vegetables, pantry food, preserves, plants and seeds into one welcoming community event. Alongside this, we are developing a wider Library of Things, expanding our small Library of Ideas and continuing regular Saturdays at Studio Moffat, where people can borrow, share skills, make music or simply come in for a cuppa and a conversation. Together, these projects are helping to make local skills, resources and opportunities more visible and easier to access.

Conversation has been an important part of the work too. Over twenty people attended our People's Emergency Briefing screening and discussion in July, helping us explore what climate and nature breakdown could mean locally and what action people would like to see. In September, we hosted the Climate Ready D&G Roadshow for eight days, welcoming drop-in visitors and workshop participants to Studio Moffat. We also ran a local Big Plastic Count involving 19 households and 48 people. Each activity has helped us listen, make new connections, find opportunities to collaborate and turn broad concerns about climate resilience into practical experiments rooted in everyday community life.

WHITHORN CLIMATE READY COMMUNITIES PROGRAMME UPDATE

Over the past three months, our Climate Ready Communities programme in Whithorn has really come to life! We have delivered a fantastic range of group activities alongside tailored one-to-one outdoor wellbeing sessions. The real highlight has been seeing people of all ages and backgrounds coming together to learn, connect and take positive action in ways that feel welcoming and relevant to everyday life.

There have been so many brilliant moments, including the launch of our Food & Mood Café and climate project, climate-literacy training, outdoor art with LGBT Youth Scotland, volunteer development, community growing and climate conversations. Our creative Waste to Wonder lantern sessions and willow bird-feeder workshop also showed how simple, practical activities can encourage people to reuse materials and support local wildlife and biodiversity.

Our Men in Motion and Women in Motion programmes have supported confidence, mental health, movement and connection with nature through personalised outdoor sessions. What has worked so well is bringing climate action into the things people already connect with—food, creativity, wellbeing, conversation and the great outdoors.

Looking ahead, our new community planters are now on order, and we'll be working alongside other local groups to bring them to life. New working relationships are growing, everyone is beginning to pull together, and it feels so good to see the plans we have been talking about becoming something real. We are incredibly proud of the energy building in our wee community and excited about what comes next!

STRANRAER CLIMATE READY COMMUNITY UPDATE

Over the past three months, the Creative Stranraer Hub has continued to support the Becoming Climate Ready Community programme through a diverse range of creative, educational and environmentally focused activities. A series of new workshops encouraged participants to explore sustainability through art, including creative writing sessions and a community weaving project that reused reclaimed materials while celebrating traditional weaving methods and skills. Local artists led workshops using natural and renewable materials, helping participants learn about sustainable creative practices and the value of locally sourced resources.

Environmental awareness and climate education have been central to the programme. The Mums in Mind group took part in a coastal marine conservation walk led by Solway Firth Partnership and SCAMP biologists, providing an opportunity to learn about local ecosystems and marine conservation. Participants also explored Loch Ryan's rich biodiversity.

Working in partnership with SCAMP, Solway Firth Partnership, WSA and ONUS, the Hub delivered an engaging Beach School programme on the shores of Loch Ryan. Participants investigated local marine biodiversity, learned about the impacts of climate change on coastal environments, collected and identified marine species, examined specimens under microscopes and took part in nature-based learning activities. Creative elements, including cyanotype printing and accessible arts activities, helped deepen connections with the coastal environment. Collectively, these activities increased environmental awareness, strengthened understanding of climate resilience and biodiversity, and encouraged community members of all ages to actively engage with the natural environment while developing new skills and confidence.

REGIONAL ADAPTATION PLAN CLIMATE READY ROADSHOW

The Galloway and South Ayr Biosphere and D&G Climate Hub will be delivering a region wide roadshow in conjunction with the Scottish Governments Regional Adaptation Plan. Climate Ready Regions are partnerships that bring together local authorities, public bodies, businesses, communities and the third sector from across a region to collaborate on shared climate risks and build climate resilient places, communities and economies. Climate Ready Dumfries & Galloway is working with partners to look at how climate change adaptation can be implemented as part of their activities. It supports Scotland's Third National Adaptation Plan 2024-2029 (SNAP3).There are 10 locations across region from Langholm through to Stranraer.

We also engaged an expert speaker in each area, to discuss local climate change impacts and adaptations, and to discover and map people's experiences of the effects of climate change locally.

Should you wish more information please look at the RAP page on the GSA Biosphere website ; https://www.gsabiosphere.org.uk/ and follow us on Facebook; https://www.facebook.com/DGclimatehub

Please so have your say on climate impacts and complete the Experiences form and/or add to the Green map, all on the links as above.

OUR DELIVERY PARTNERS

Dumfries and Galloway Climate Hub Key Partners 2025/26:

Propagate:

Holistic support for community groups around local food growing, environmentally sound growing techniques, food share, site visits, network facilitation and funding signposting and support.

www.propagate.org.uk

Crichton Carbon Centre:

Climate and biodiversity learning for primary schools including eco-emotions and support for eco-groups to take action.

www.carboncentre.org

South West Scotland Environmental Information Centre:

Citizen science training and biodiversity improvement support for communities in Dumfries and Galloway and Ayrshire.

www.swseic.org.uk

Dumfries and Galloway Multicultural Association (DGMA):

Working specifically with diverse and marginalised communities in Dumfries and Galloway. They are new to the climate conversation, but focus on re-use and sustainability.

www.dgma.org.uk

Machars & Cree Valley Climate Action Network:

The first community action group in Dumfries and Galloway. They regularly hold climate conversations, citizen science, skills sharing and creative climate engagement activities for communities.

www.mac-can.org

Dumfries and Galloway Climate Hub is hosted by the **Galloway and Southern Ayrshire Biosphere Partnership**.

GALLOWAY AND SOUTHERN AYRSHIRE BIOSPHERE

ABOUT THE GALLOWAY AND SOUTHERN AYRSHIRE BIOSPHERE

Galloway and Southern Ayrshire was the first UNESCO Biosphere in Scotland. The designation was awarded by the **United Nations Educational, Scientific and Cultural Organisation (UNESCO)** in 2012, recognising the fact that it is a world class environment for people and nature. There are only seven UNESCO Biospheres in the UK, but more than 740 around the world.

The **Galloway & Southern Ayrshire Biosphere Partnership** is a registered Scottish charity (SC044137) led by a Board of Trustees who live and work in the region. The Partnership aims to bring diverse, multi-sector groups together in collaborative projects that help create a better future for people and nature.

OUR GOALS:

Conservation: promoting the conservation of landscapes, wildlife and habitats

Learning: supporting a better understanding of global challenges

Sustainable Development: fostering a sustainable economy and society

Climate Change: supporting the resilience of communities in facing climate change impacts

The **Galloway & Southern Ayrshire UNESCO Biosphere** covers more than 9,700km² of southwest Scotland and is home to more than 100,000 people. Its geographical boundary was defined in 2012 based on catchments of the rivers flowing out of the Galloway Hills, and was extended to include the marine environment in 2023.

The UNESCO Biosphere promotes a balanced relationship between people and the natural environment, through establishing effective partnerships, community engagement, innovative projects, research and learning. Encouraging local communities to act collaboratively to build thriving sustainable societies in harmony with their natural surroundings.
